<p>OCA15. Anotácia výstupu s kontextovými informáciami týkajúcimi sa opisu tvorivého procesu a obsahu tvorivej činnosti a pod. / Annotation of the output with contextual information concerning the description of creative process and the content of the research/artistic/other activity, etc. <sup>8</sup>Rozsah do 200 slov v slovenskom jazyku / Range up to 200 words in Slovak <sup>9</sup>Rozsah do 200 slov v anglickom jazyku / Range up to 200 words in English</p>	<p>Podiel autora je v spracovaní: Podiel na zbere údajov na základných školách vo východoslovenskom kraji. Spracovanie a distribúcia meracieho nástroja. Distribúcia dotazníkov na centrálnu spracovanie. Vytvorenie databázy a deskriptívnych výstupov. / The author's contribution: Author's share in processing; share in data collection at primary schools in the East Slovak region. Processing and distribution of the measuring instrument. Distribution of questionnaires for central processing. Creation of database and descriptive outputs.</p>
<p>OCA16. Anotácia výstupu v anglickom jazyku / Annotation of the output in English <sup>9</sup>Rozsah do 200 slov / Range up to 200 words</p>	<p>To show selected findings from the Global Youth Tobacco Survey (GYTS) conducted in Czech Republic, Hungary, Poland and Slovakia. Methods: Representative sample of 16 918 school children aged 13-15 years; data were obtained through uniform questionnaires. The fieldwork was conducted in 2002 and 2003. Results: Age at initiation of smoking was particularly earlier in Czech Republic, Poland, and Slovakia than in Hungary. Over one third of the students reported current cigarette smoking in Czech Republic (34.9%) and Hungary (33.5%) compared to about one-fourth in Slovakia (24.3%) and Poland (23.3%). Among current smokers, about two thirds in Slovakia (64.0%) desired to stop smoking, while only one third in Hungary (36.7%). The prevalence of current cigarette smoking was similar between genders. Discussion: Smoking prevalence in these countries is considerably higher than worldwide data. Women's smoking could be an important public health problem in the future. Repeated surveys could show trends and give a clearer picture of the epidemiological situation.</p>
<p>OCA17. Zoznam najviac 5 najvýznamnejších ohlasov na výstup / List of maximum 5 most significant citations corresponding to the output <sup>9</sup>Rozsah do 200 slov / Range up to 200 words</p>	<ol style="list-style-type: none"> <li>1.
