Reakcia spoločnosti na pandémiu vyústila do zdravotníckeho, sociálneho a ekonomického narušenia. Viedlo to k odloženiu alebo zrušeniu viacerých kultúrno-spoločenských a športových udalostí, rozsiahlemu nedostatku dodávok zdravotníckeho materiálu a zhoršenému panickému strachu v spoločnosti. Z výstupu vyplýva, že zúčastnení participanti (sestry) v nemocniciach v čase koróna vírovej vlny COVID-19 boli spokojní so sociálnym pracovníkom. Môžeme konštatovať, že pandémia Covid-19 doteraz ovplyvnila fungovanie rôznych profesií, nevynímajúc sociálnu prácu a sociálnych pracovníkov v celom svete. Pandémia, ktorej posledný rok čelíme spája čoraz viac našu spoločnosť nielen odborne, ale i ľudsky. Je preto potrebné, aby si ľudia uvedomili akú záslužnú a odbornú prácu vykoná multidisciplinárny, ktorého členom je aj sociálny pracovník. / The output is focused on the perception of social workers by nurses in hospitals in the Czech Republic and Slovakia at the time of the COVID-19 pandemic. Society's response to the pandemic resulted in health, social and economic disruption. It led to the postponement or cancellation of several cultural, social and sports events, a large lack of medical supplies and a deepened panic fear in society. The output shows that the participants (nurses) in hospitals at the time of the COVID-19 coronavirus wave were satisfied with the social worker. We can state that the Covid-19 pandemic has so far affected the functioning of various professions, including social work and social workers around the world. The pandemic that we have been facing for the last year is bringing our society closer not only professionally, but also humanly. It is therefore necessary for people to realize the meritorious and professional work carried out by a multidisciplinary team, which also includes a social worker.</p>
